

Boston Freedom Rally September 15-17, 2017

Session Title

The Basics of Growing Cannabis at Home: Education, Safety, and Cultivation

Session Date: Time TBD, Saturday in the village. More details to come.

Session Summary

This will be a 30-minute introductory session to the basics of growing Cannabis at home with the new laws passed in Massachusetts. Participants will learn about the new home grow laws, home grow education opportunities and best practices for growing at home.

Session Objectives

Participants will learn:

- New home grow laws in Massachusetts
- How to design a home grow room, and considerations to ensure safety and prevent mold and other contaminants
- Overview of different growing methods and media, pros and cons

Speakers: Each speaker to talk for 5-7 minutes for a 30-minute session

Moderator: Randy MacCaffrie, CEO Integrating Design

- Grow room construction and design, consulting on fire and safety, prevention of molds and other containments

Ethan Vogt, Home Grown Boston

- Innovative methods for educating home growers and accessing experts in the field

Jesse, Automated Gardener (TBD)

- Electrical considerations and lighting options

Hilary Cheeseman, Plant Scientist, Integrating Design

- Basics of different methods of growing Cannabis at home, including various media and ensuring pest management.
